Celebrating 10 Years

Artwork Submission Guidelines

We operate in a Mac & PC environment. Please submit your artwork in "Vector" format created in the programs listed below. Vector is the best type of art to use in our application of printing.

When sending your artwork by email, Please Do Not compress your files with WinZip or Stuffit.

Save your electronic artwork in Adobe Illustrator CS6 or earlier version with a .eps, pdf, or ai extension. Corel Draw 13 or earlier version, saved with the extension .cdr or "publish to pdf". Please note, all fonts/text must be converted to "Create Outlines" - for Illustrator and "Convert to Curves" for Corel Draw. All art must be on one layer and not locked or linked. Do Not embed bitmaps such as - psd, jpg, jpeg, tif, tiff, bmp in any of these file formats as they will not work with our film output. Technical drawings created in AutoCAD can sometimes be used but there are limitations and we can't guarantee results. Most times files can be translated without conflict.

File formats we don't accept - psd, jpg, jpeg, tif, tiff, bmp, Microsoft Word, Publisher, Power Point.

If for some reason your files cannot be read, we will work with you to find a solution. If you need any further guidance, please email the Vision Screen Print Art Department at art@visionscreenprint.ca or call 519-342-0966 and they will be happy to assist you.
